*****ATTENTION*****

Bennington Residents, if you have a sump pump that is connected directly to the city sewer, it must be removed IMMEDIATELY! Refer to ordinance #15-411 in the city code. Sump pumps cause our treatment process for our sewer system to be ineffective. We have recently fell out of compliance with KDHE because of it. In order to avoid sewer increases on your bill, we need your immediate cooperation. Sump Pumps need to be plumbed to its own drain system not into the city main. We are trying to avoid raising sewer rates again! Please do your part!! Thank you!!!!

++++Compliance++++

We will be focusing on Inoperable vehicles, vehicles with no tags or expired tags, etc. Notices will be going out. Vehicles must be driven to the city office to prove they are in compliance. You must show proof of current tags as well. Thank you for your cooperation!
