

September 2022 Newsletter

A video surveillance system has become necessary to prevent or hold responsible anyone choosing to do damage on or to any city property. This includes the pool, splash pad, park and rodeo grounds. While we encourage and welcome all our citizens to enjoy these areas, we need to put an end to vandalism that has occurred throughout the area. Some of the buildings at the arena have been vandalized, the fence around the park has been damaged several times by vehicles and golf carts being ran into it, and the new splash pad had to close early because of dirt put into the pad drains which all filtered back into the swimming pool rendering it unable to use until it was all cleaned and very expensive chemicals purchased to treat the damage done by all the mud. The city will press charges if we catch anyone on camera in the future doing damage to anything.

RECYCLING NEWS

Bennington Recycling Center has found a different processing facility for our recycling.

We are asking the individuals please separate their #1 & #2 plastics. Labels on the bins will let you know where to put each one.

If you would like to volunteer, please come to the Center at 7 a.m. on Mondays &/or Fridays.

Thank you for your cooperation as we implement this change.
